Responsibilities of stakeholders	21
Organizational options in a parliamentary setting.....	24
The need for strategic planning.....	27
Project management and enterprise architecture	29
Resources.....	30
Knowledge of ICT.....	31
Comments on parliamentary practices	31
Summary.....	32
Chapter IV: Infrastructures and Services	35
The essential foundation of e-parliament.....	35
A cost and an investment.....	35
Relationship to the vision and the strategic plan.....	36
Results from the survey.....	39
General ICT services	39
Systems and services for members and staff	42
Networks and servers	46
General applications	47
Applications specific to parliament	49
Staff	52
Budget.....	56
Examples from two parliaments.....	57
Comments on parliamentary practices	59
Findings	59

Chapter V: Documenting the Legislative Process.....	63
Preparing bills and amendments.....	64
Systems for bills.....	64
Systems for amendments.....	66
Committee documents and activities.....	67
Systems for hearings.....	67
Systems for reports.....	68
Systems for meetings and actions.....	68
Plenary documents and activities.....	70
Systems for debates and speeches.....	70
Systems for votes.....	70
Systems for minutes of sessions.....	71
Government documents and activities.....	72
Characteristics of systems for committee, plenary, and government actions.....	73
Document standards.....	73
Advantages of open standards for legislative documents.....	74
Challenges in establishing and using open document standards.....	75
Survey results on open document standards.....	76
Comments on parliamentary practices.....	79
Efforts to develop legislative open document standards.....	80
Italian Norme in Rete Project.....	80
Austrian e-Law Project.....	81
Canadian Prism Project.....	82
African AKOMA NTOSO Project.....	82
MetaLex.....	83
Nagoya University Research Project.....	83
Legislative and legal informatics.....	84
Findings.....	84
Chapter VI: Parliamentary Websites.....	87
The role of websites.....	87
Committee websites.....	89
Member websites.....	90
Guidelines and standards for websites.....	90
Intranet and Internet websites.....	91
Results from the survey.....	91
Goals and management of parliamentary websites.....	91
Content of websites for parliaments and IPU guidelines.....	94
Content of websites: availability and timeliness of documents.....	96
Linking documents to proposed legislation.....	100
Interface design.....	101
Audio and video technology.....	103
Notification systems and services.....	104
Differences between websites for parliament and the public.....	105
Availability of downloadable documents and information files.....	105
Improvements planned.....	106
Comments on parliamentary practices.....	108
Findings.....	109

Chapter VII: Building a Knowledge Base for Parliament.....	111
Parliaments and information.....	111
Building blocks.....	112
Use of ICT by libraries and information centres.....	113
Access to Internet resources.....	114
Access to policy and legislative analysis.....	116
Integrating and organizing information.....	119
Archiving information.....	121
Findings.....	122
Chapter VIII: Parliaments and Citizens: Enhancing the Dialogue.....	125
Methods for citizens to communicate.....	128
E-mail.....	128
Online discussions.....	130
Other methods for communicating views.....	131
Methods for members to communicate.....	134
Websites.....	134
Broadcasting and webcasting.....	135
Findings.....	137
Chapter IX: Cooperation and Coordination.....	141
Examples of cooperation.....	143
European Centre for Parliamentary Research and Documentation.....	143
National Conference of State Legislatures.....	144
African Parliamentary Knowledge Network.....	145
Latin American Network of IT Experts in Parliament.....	146
Association of Secretaries General of Parliaments.....	146
International Federation of Library Associations.....	147
Value of global cooperation.....	147
Opportunities for collaboration.....	149
Role of the Global Centre for ICT in Parliament.....	149
Chapter X: Conclusions and Recommendations.....	151
How parliaments are doing: summary of key findings.....	151
Envisioning, planning and implementing ICT in parliament.....	151
Managing legislative information.....	151
Providing access to legislative information.....	152
Technical resources.....	152
Human resources.....	152
Building an informed legislature.....	152
Interacting with citizens.....	153
Levels of ICT in parliament.....	153
The higher end: extensive ICT use.....	153
The lower end: not meeting basic services.....	153
The uneven middle ground: low to mid level ICT use.....	154
Primary conclusions.....	154
What needs to be done: recommendations.....	156
Managerial recommendations.....	156
Technical recommendations.....	157
Human resources development.....	157
Cooperation and coordination.....	157
