# 02 Selecting the Plans of Action

## 01.1 Context of the project

### Parliamentary Institutions

- Within the context of the modernization of Public Administrations and parliamentary institutions, the Chamber of Deputies has taken on this challenge, through a process of adapting to the environment around it (New needs of interest groups, both internal and external), exploring the advantages offered by the new Information and Communication Technologies
- There is a clear political desire become a benchmark, at the forefront of Modernization and technological innovation, and performance essential role in the divulgation and implementation of the use of technological tools in the administration, with the citizens and in access to all the existing
- Other Modernization Plan was born of an initiative of consensus of the Presidency and the Board of Chamber of Deputies, led by a Committee in which there is agreement between the different Parliamentary Groups, to define the basic lines of the Plan.

## 01.1 Context of the project

### Principal trends observed in the Other Parliaments

The analysis of trends aimed at detecting innovative ideas which are currently being developed in other parliaments, and which have served as the basis for identifying opportunities for improvement in the Chambers of Deputies in the following areas: projects focusing on technological and communications infrastructure, training programs, services quality, added value services, etc.

The sources used were as follows:

- analysis of existing studies within the network of the European Centre for Parliamentary Research and Documentation (ECPRD).
- application of a questionnaire through the ECPRD network, designed to gather information on the main projects currently being carried out;
- information from the websites of various international, European and autonomous parliaments;
- other Websites and the specialized bibliography on the subject

From the analysis of the main trends detected, it was concluded that there is a series of areas of activity which are common to the initiatives initiated by them, in relation to parliamentary modernization. These areas are as follows: connectivity, Internet initiatives, Intranet initiatives, Parliamentary Workflow, TV Broadcasting, Strengthening relationships with Citizens, Knowledge Management and Themed Portals.

## 01.1 Context of the project

### Areas in common with Other Parliaments

#### Connectivity

Facilitates access by Parliamentarians to the various information and communication resources, from any location.

- **Internal Connectivity:** Intelligent screens, which enable voting, sending files, initiatives, etc.
- **External Connectivity:** mobile Parliamentarian's Office

#### Internet Initiatives

Various initiatives have been started, through the development of websites and Internet Portals, aimed at raising awareness of the parliament's activities among citizens and interest groups: an example is the personal web pages of deputies, or improvements in Congress TV.

#### Intranet Initiatives

The development of shared working environments (Parliamentary Intranets) is increasing in parliamentary administration and nowadays, we find integrated environments which integrate communication platforms, access to the database, and transactions.

## 01.1 Context of the project

### Areas in common with Other Parliaments

#### Workflow Parliamentary

Information Technology, and in particular, the use of workflow tools associated with digital signatures, has brought and authentic innovation in the various administrations, at global level. This trend towards transparency in the record of initiatives is beginning to be observed in various parliamentary administrations, which are increasingly using documents in electronic format, such as through the immediate distribution of texts of bills and proposed law, amendments, collections, proposals or other written questions. Or classifying and locating parliamentary documents via the Intranet, through unique records which function like databases of documentation in electronic format.

#### TV Broadcasting

Direct broadcasting of sessions of the Congresses and Plenary assembly, via the Internet, Classification by body.

#### Strengthening relationships with Citizens

Interactive forums for debate, selective publicizing of information, addressing specific groups.

#### Knowledge Management

Creation of “knowledge portals”, which enable access to a wide range of resources, and connection with the Intranet or Web page of the entity. Online Libraries.

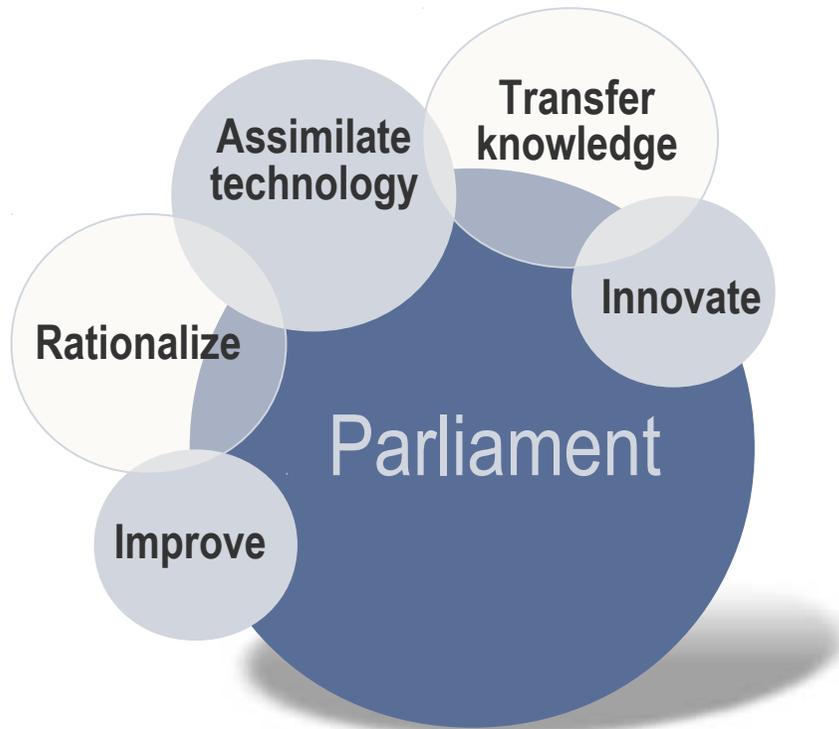

#### Themed Portals

Intranet for parliamentarians and personnel.

## 01.2 Aims and Objectives

### Objectives of the Strategic Modernization Plan

**Innote** The excellence of modernization is obtained through the transformation of ideas into new services, processes and/or ways of working, based on Information Technology and communication.

**Improve** Increase the efficiency of management and propose processes of continual improvement, analysing the tasks carried out.

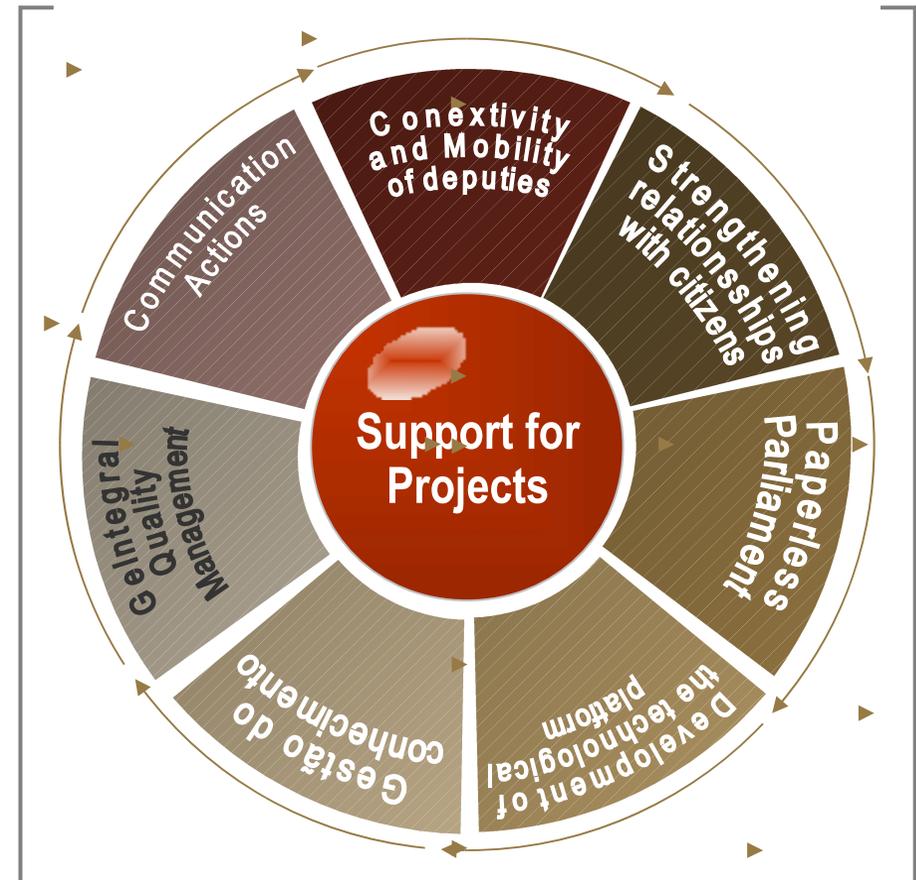

**Approximate** Open Parliament for all citizens. Make parliamentary activity and relationships with citizens more transparent and accessible.

## 01.2 Aims and objectives

### Scope of the Modernization Plan and Strategic Lines

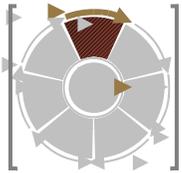

- **Within a two year period, place the Chamber of Deputies at a higher level of excellence,** within the public and administration sectors.
- **Fully modernize the organization of internal working methods and forms of relating** with other Administrations, institutions, and citizens.
- **Offer personalized services** to internal users (deputies, employees, office staffs, assistants).
- **Make the Parliament more transparent and accessible to citizens,** divulging knowledge of its work and promoting active participation.

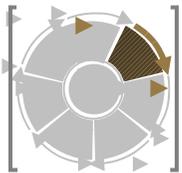

## 01.3 Strategic lines

### Strategic lines

#### 1. Connectivity and mobility of the Deputy

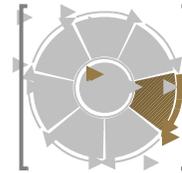

Provide Deputies with adequate technological means that will their advisors, assistants and the management of the Parliamentary Group and the Chamber itself, maximizing the yield of the information and management systems of the Congress.

#### 2. Strengthening relationships with citizens

Facilitate channels of communication between Deputies and Groups of Parliamentarians, and citizens.

Ensure the transparency of the parliamentary institution and other relationships with citizens by providing sources and channels of specific information.

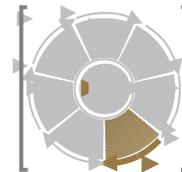

#### 3. Paperless Parliament

Encourage the use of technologies for the exchange of information and communications, between the various agents of the Congress of Deputies.

Modernize working means and processes, to provide an integral system which enables information technology support, adapted to all the processes of the Chamber, and in particular, the management of parliamentary initiatives.

Enable processing and proceedings to be carried out remotely, with the maximum security guarantees.

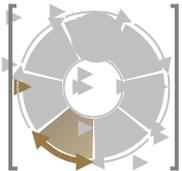

#### 4. Development of the technological platform

Dimensioning and making available a technological platform which supports the information and communication needs of users of the Chamber / Modernization Plan.

## 01.3 Strategic lines

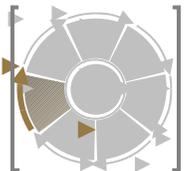

### Strategic lines (cont.)

#### 5. Knowledge Management

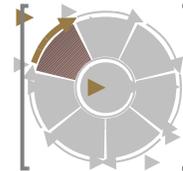

Consolidation of the offer of information and document services of the Chamber of Deputies, through the creation of an integrated, centralized and accessible model for those services.

Enable the document and information sources of the Chamber to be widely and efficiently publicized, through the various channels offered by the technologies.

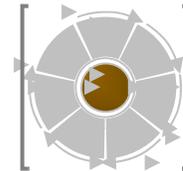

#### 6. Communication actions

Promote the institutional image of the Chamber of Deputies, providing information on its institutional activity and widening the contents and publicizing of the Parliamentary Channel.

#### 7. Integral quality management

Establishment of a management model focused on guaranteeing that levels of satisfaction of the services provided by the Chamber meet users' expectations.

#### 8. Support projects

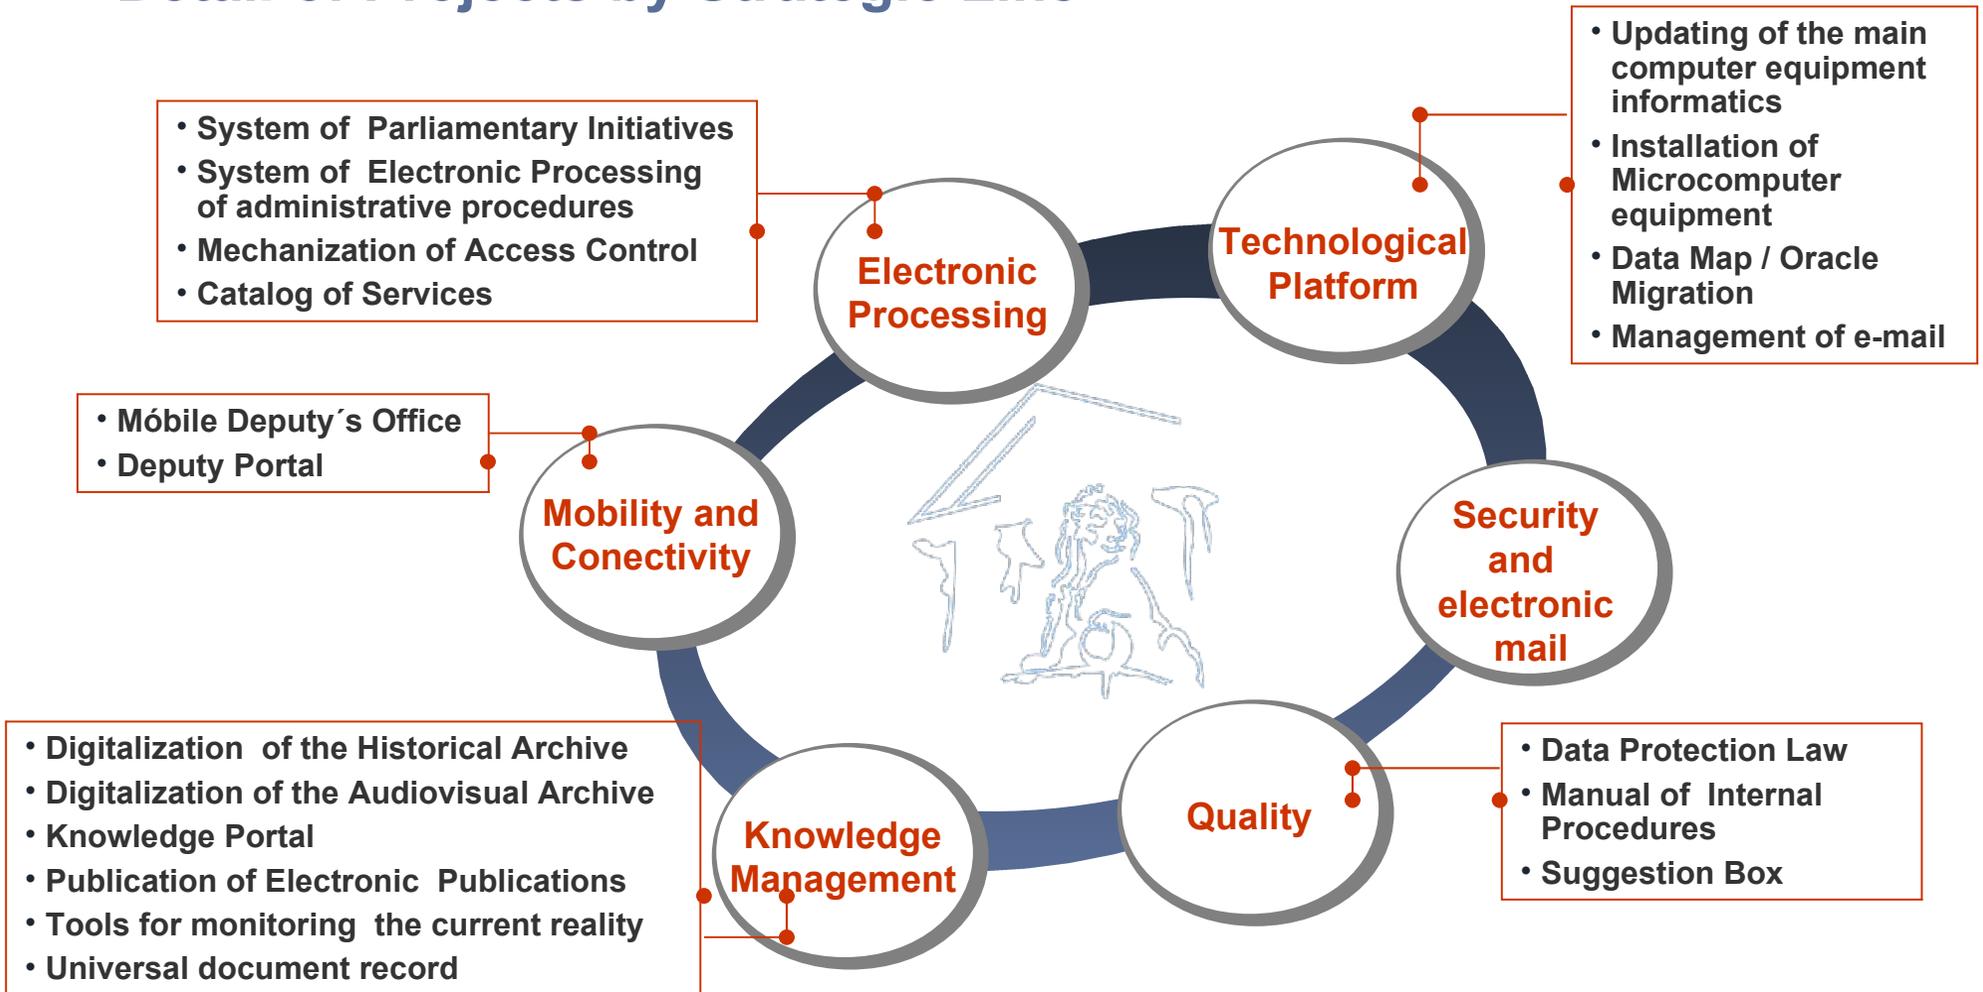

Ensure the execution of the Modernization Plan, in accordance with the parameters defined, and meeting the quality standards, deadlines, budgets and objectives.

Promote the appropriate use of services derived from the Modernization Plan.

## 02.1 Parliamentary Initiatives

### *Electronic Record*

Within the **Modernization Plan** is the “**Integral System of Parliamentary Initiatives**” project, which involves migrating the current System (ARGO) to a System which will enable Parliaments to:

- carry out **complete electronic management of parliamentary initiatives**: presentation, processing and publication.
- use **confidentiality, integrity and validation** which guarantee the use of the **Electronic Signature**.
- **register and maintain** the parliamentary initiatives with full text during their processing and filing.
- **favor access, modality and** communication of the parliamentary processing systems.
- **complement the parliamentary processing** with audiovisual contents and associated digital files.

#### Record of Initiatives:

**register the entry of Parliamentary Initiatives** which are **presented** in the General Records of the Congress of Deputies, **in the digital form** and through the use of electronic forms

**register the entry of Parliamentary Initiatives** which are **presented** in the General Records of the Congress of Deputies, **in digital form** and through the use of electronic forms

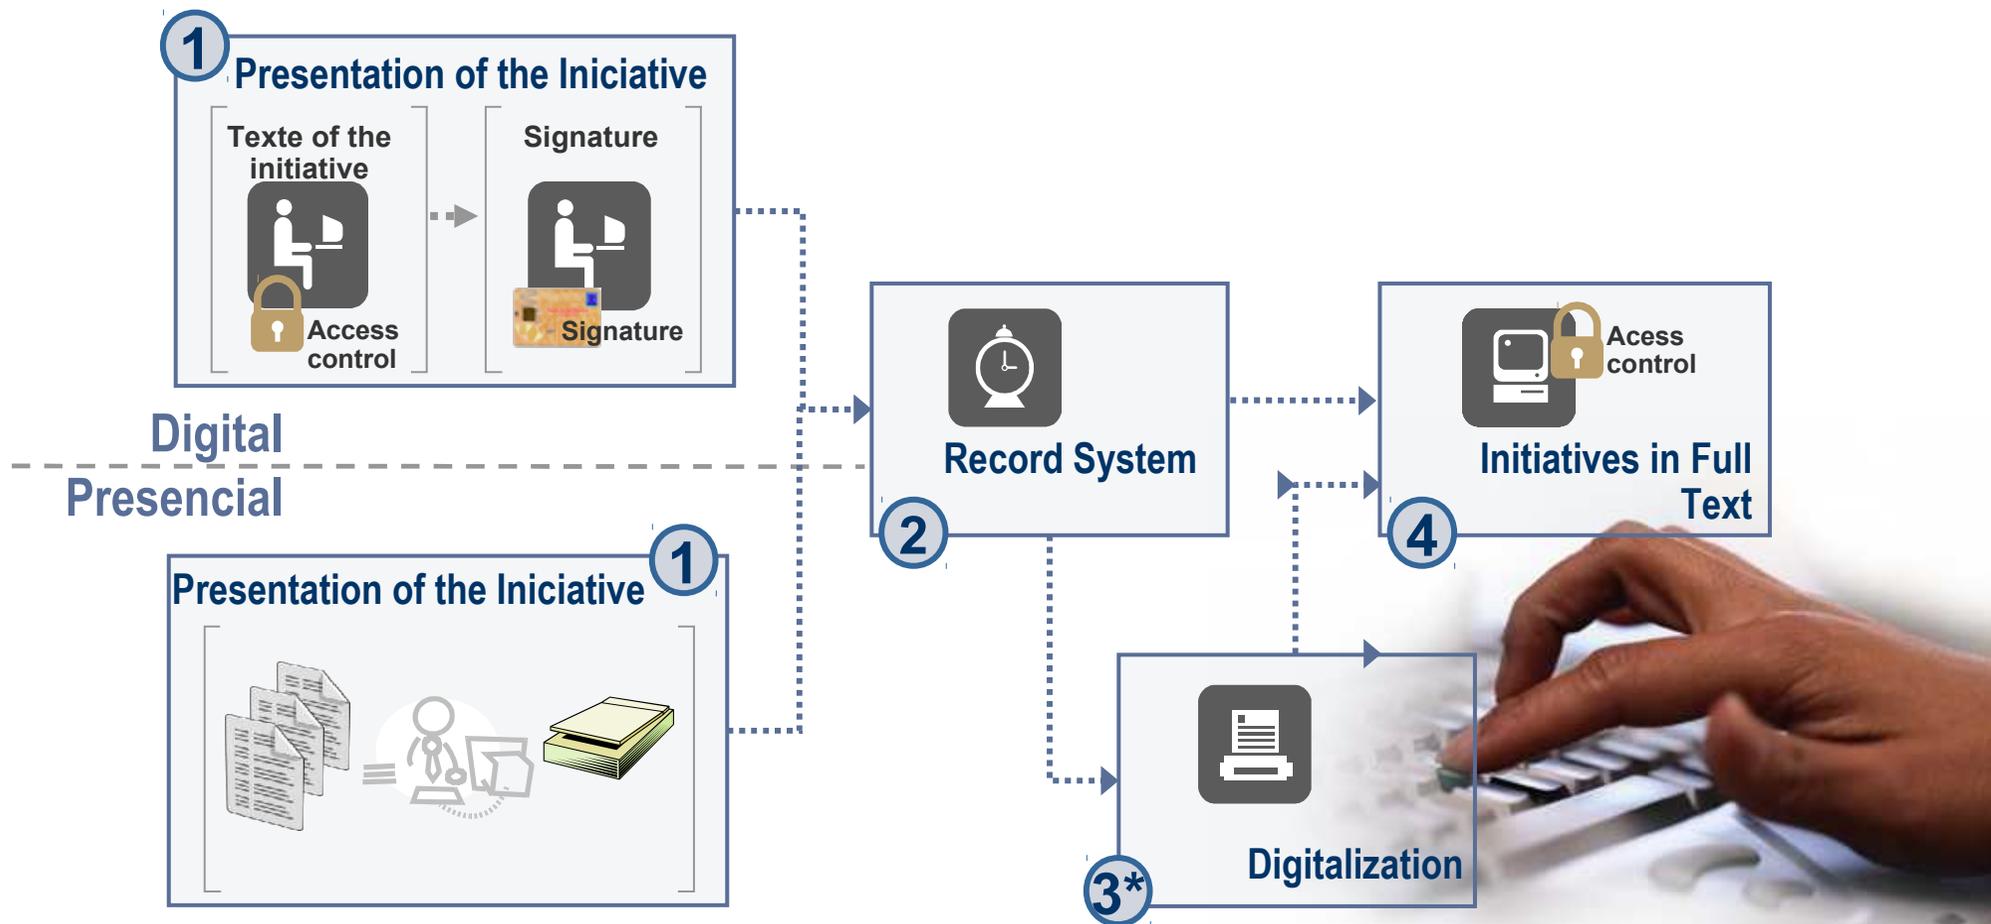

**Initiate totally electronic processing** of the Parliamentary initiatives registered on the System, whatever their origin and mode or presentation

### Electronic Signature

Approval or  
rejection of the  
Initiative  
elaborated

Once the initiative is  
carried out, the deputy  
can electronically  
sign the document  
elaborated.

For this, he or she  
must access the  
electronic signature  
terminal and using the  
electronic card, carry  
out the operation.

### Proposed Solution

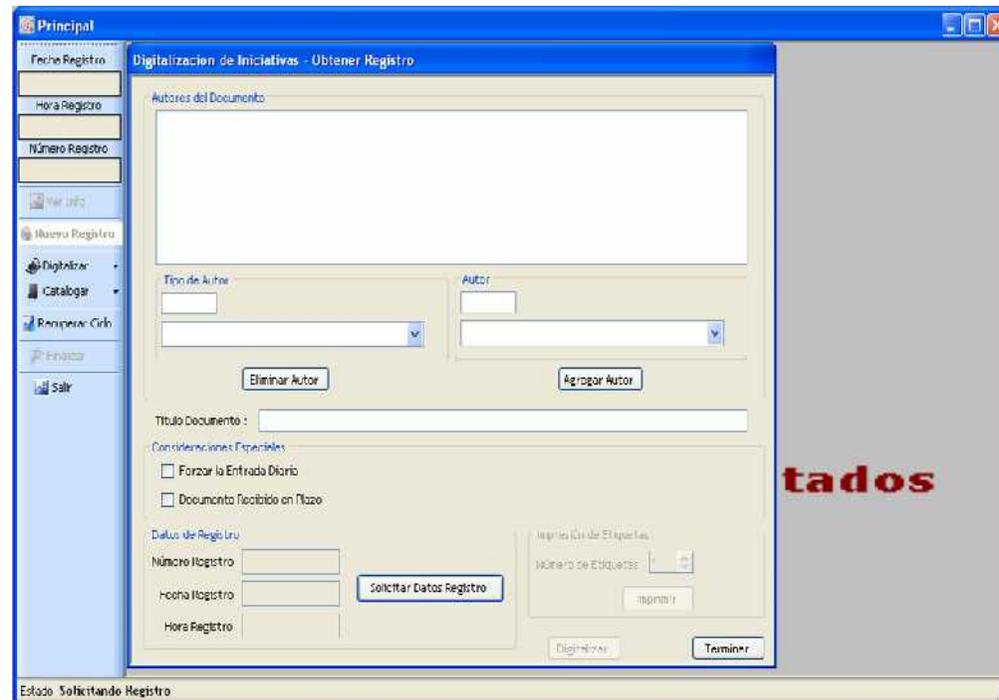

## 02.1 Parliamentary Initiatives *Presencial Record*

**Record**

**tados**

The receiver of the document is responsible for receiving, in person, the entry documents, through the General Record, and accesses the Record confirmation screen.

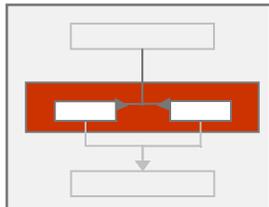

The initiative is registered by clicking on “Request Record data”.

The application will automatically designate a record accession number corresponding to the new entry, the date and time when the presentation is made (taken from the time server). These fields cannot be edited or altered.

## 02.1 Parliamentary Initiatives

### *Presencial Record*

### *Digitalization*

**Immediate**

**Deferred**

Depending when it is carried out, the documentation can be digitalized in two different ways:

**A**  
OPTION

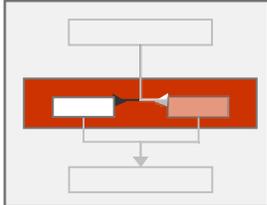

**DEFERRED Digitalization**, which is done subsequent to the presentation of documentation, so that the digitalization does not cause a delay to other users of the General Record.

**B.**  
OPTION

**IMMEDIATE Digitalization**, which is done when the document is received and the record number is designated, in the electronic record service.

# 02.1 Parliamentary Initiatives Presential Record

## Digitalization Deferred Digitalization

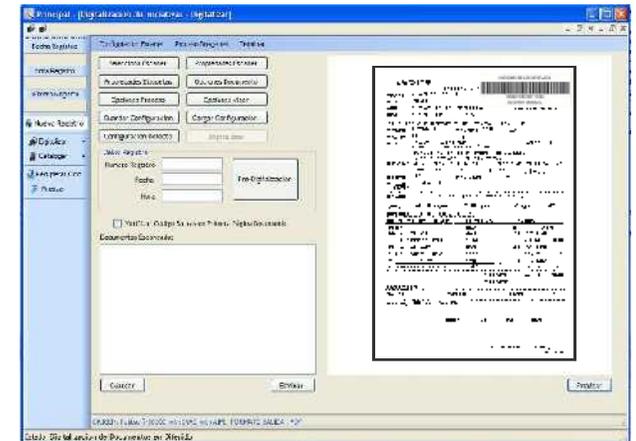

Printing  
labels

Sticking  
labels

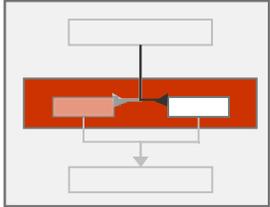

Scanning of labeled  
documentation and viewing the  
document (in pdf format) on the  
application

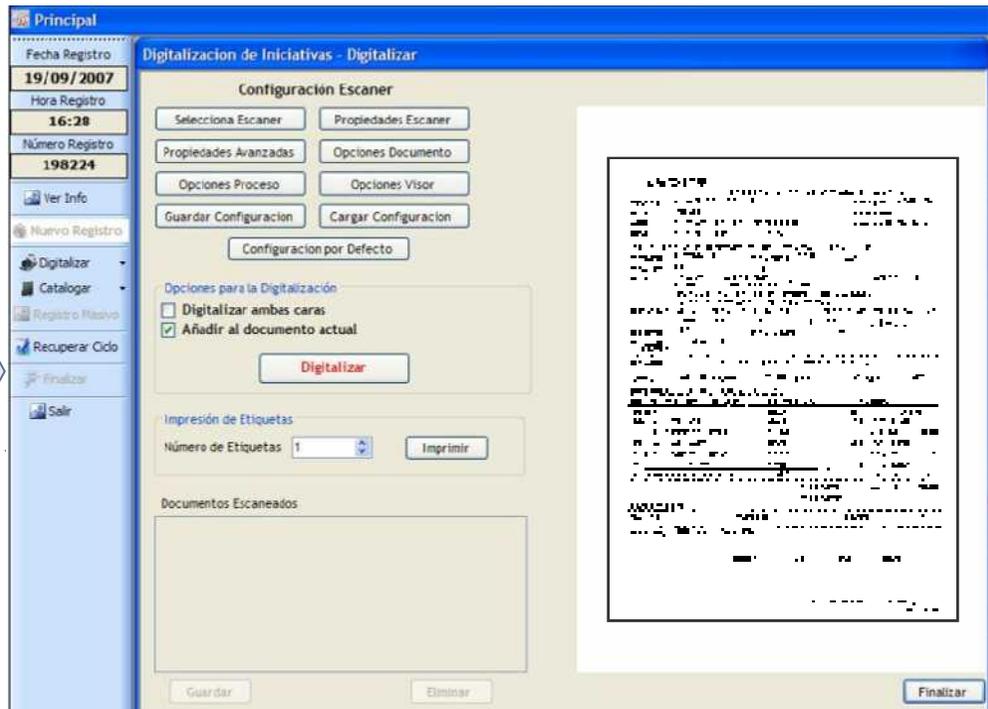

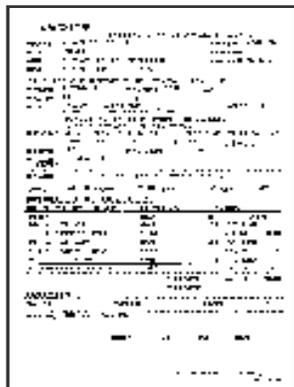

## 02.1 Parliamentary Initiatives *Presencial Record*

### **Digitalization** **Immediate Digitalization**

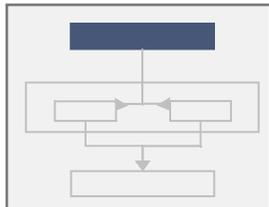

The document is digitalized when it is received, and the record number is requested.

Immediately afterwards, the record information is placed on the back (“record number”, “date” and “time”).

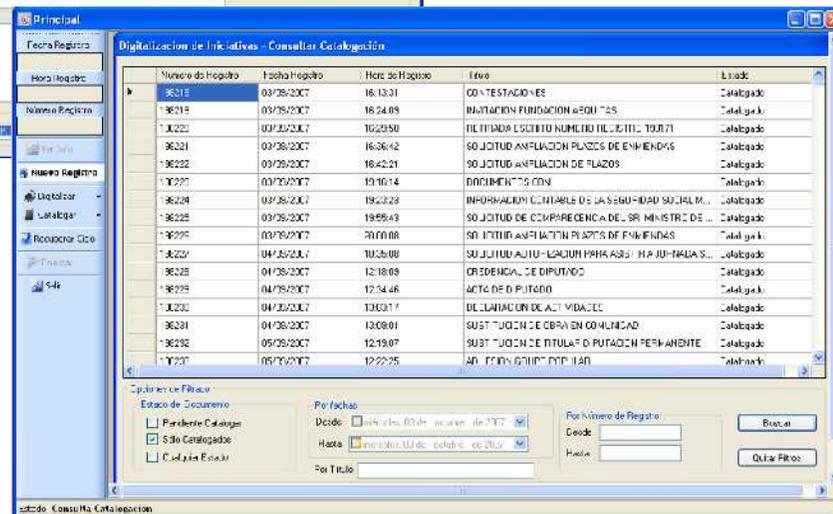

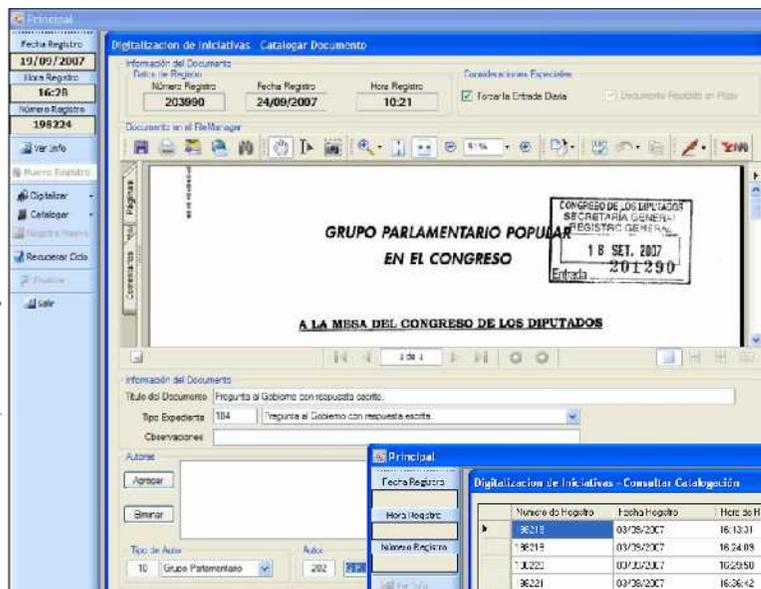

# 02.1 Parliamentary Initiatives Presencial Record

## Cataloguing

Regardless of the digitalization option, the user of the records program should add the other attributes to the record, after receiving the document.

Users of the program may consult the records awaiting cataloguing, so that they are processed afterwards, and the data saved in the database of the Chambers of Deputies.

## 02.1 Parliamentary Initiatives

### *Daily Entry*

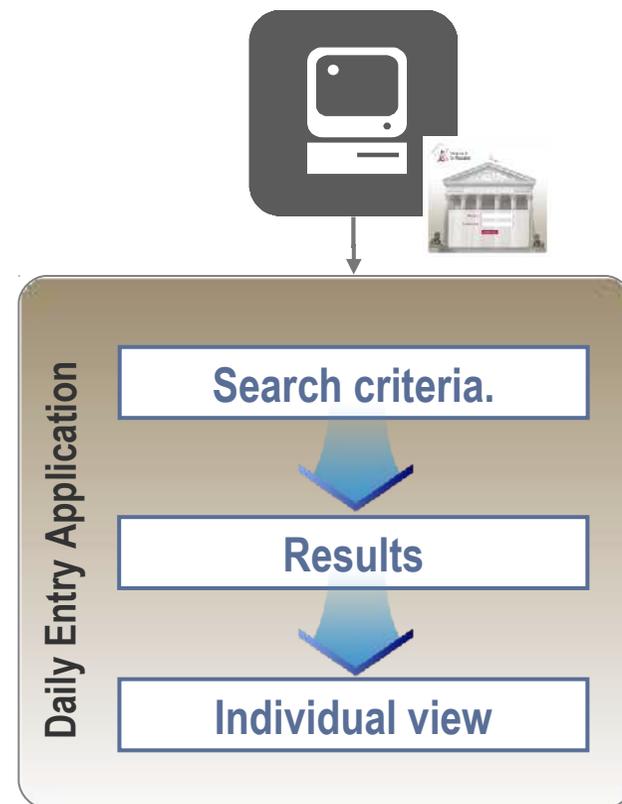

## Proposal Solution

The Daily Entry consists of all the Parliamentary Initiatives recorded in the General Entry Record of the Chamber of Deputies on that day (digital and presential).

To avoid hard copy distribution, which is carried out annually, the Chambers s of Deputies has developed a Web application where this information can be consulted.

The funcctionalities established in this program are as follows:

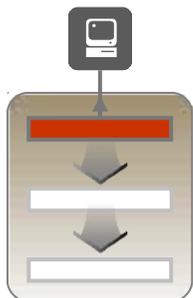

- Search criteria.
- List of results.
- Viewing the parliamentary initiative presented

## 02.1 Parliamentary Initiatives

### Daily Entry

### Proposed Solution

Users of the program can set up the following search filters:

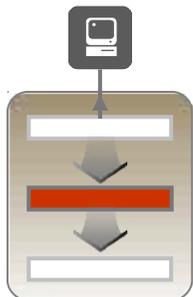

- By entry type: Daily, urgent and non-visible; morning or afternoon shift.
- By modality of typology of working day registered: Written questions, complete question, etc.
- By the name of the author who elaborated the Initiative: Deputy, private individual, etc.

# 02.1 Parliamentary Initiatives

## Daily Entry

### Results

Users of the program obtain the results for the previously established criteria in the form of a table, showing the record number of the initiative, date and time, title and author.

## 02.1 Parliamentary Initiatives

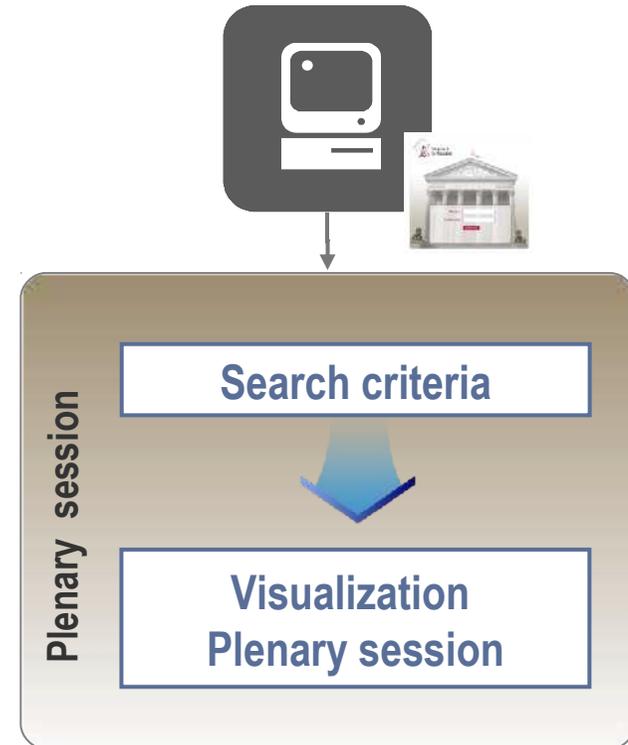

### *Plenary Session*

## Proposal Solution

A Web application which enables “paperless” management of the Board of the Chamber of Deputies, in order to improve the efficiency of the search and the processing of the parliamentary initiatives presented by the deputies and/or parliamentary groups in the Records of the Chamber of Deputies, with the agreements and proposals agreed by the Board.

The functionalities established in this program are:

- Search criteria
- Viewing the points dealt with at a Plenary Meeting: Red Index, Annexes, Minutes, etc.

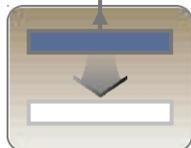

## 02.1 Parliamentary Initiatives Plenary Session

### Selection criteria

The user of the application selects, within the informative content that he/she wishes to search, the day on which the Plenary Meeting was held, and its invitation.

(004) DECLARACIÓN DE ACTIVIDADES.

004/000227/0002	25/09/07	202735
-----------------	----------	--------

AUTOR: Mayoral Cortés, Victorino (GS)  
Declaración de modificación de la de actividades.

NOTA:  
Este escrito ha sido trasladado a la Comisión del Estatuto de los Diputados e incorporado al Registro de Intereses.

## 02.2 Record of Congresses

### *Record of Amendments*

**The Area of Congresses functions like another Internal organ, in the Record of Parliamentary Initiatives.**

**It, in turn, has its own record (both digital and presential) for recording amendments:**

**PNL amendments**

**legislative amendments**

**The record of Congresses follows the same workflow process as that of the Parliamentary Initiatives.**

## 02.3 Mobile Deputy's Office

*Interactive and on demand access to the parliamentary information and contents*

## 02.3 Mobile Deputy's Office

### *Main services to provide by the Mobile Office*

#### **Access to e-mail and Agenda/Contacts**

- Instant access and reception by using GPRS/UMTS synchronization, with syncML technology
- Electronic signature

#### **Internet and Intranet Navigation / Access to web sites and parliamentary information**

- Spanish Parliament web site
- Parliamentary Group web site
- Content & Documentation Management
- 5 on-line channels, Parliament TV
- Video on demand, recorded sessions
- Parliament members portal
- Employees portal

#### **Electronic Management of the Parliamentary Initiatives**

- Access deploying the Parliament Members portal
- Initiate a new proposal procedure
- Follow-up the state of initiatives
- Action request
- Alarms & notifications of Rejections or Approvals, etc.

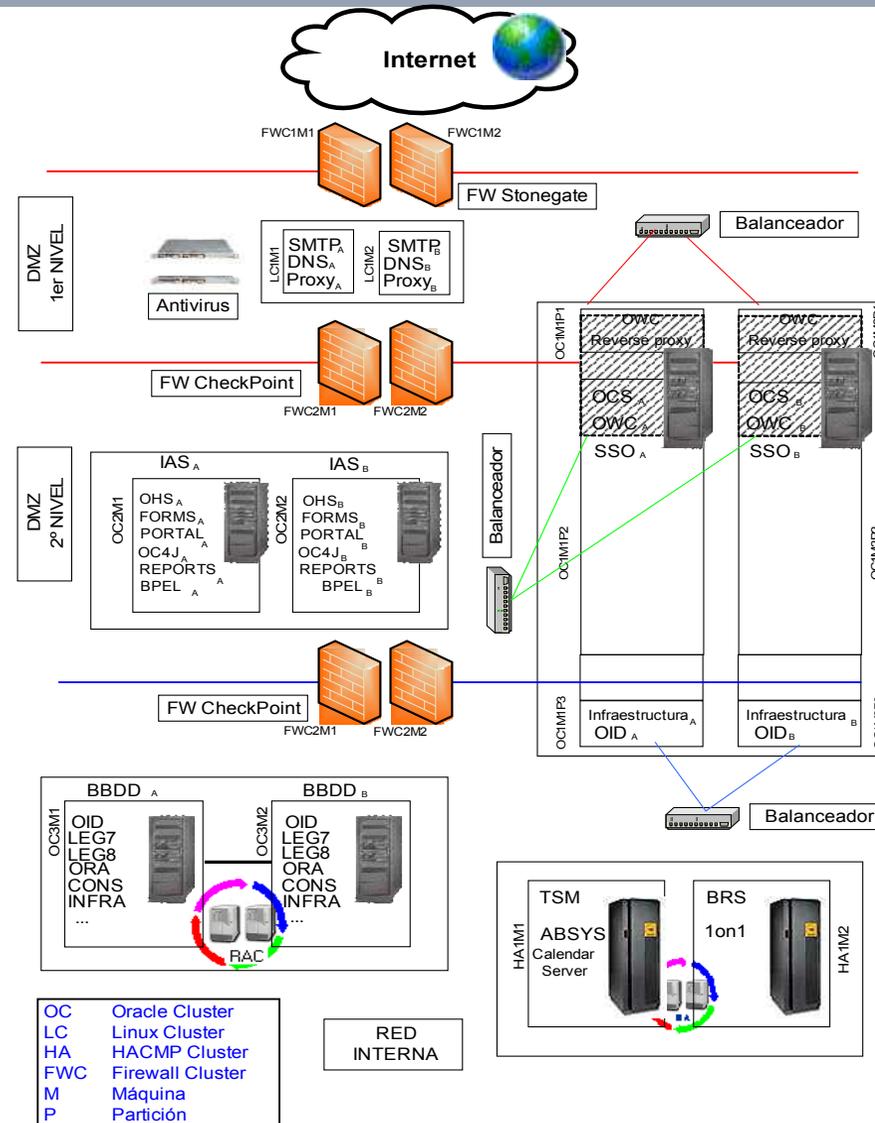

#### **Electronic Management of Administrative Procedures (expenses of trips, meeting room reservation...)**

- Access deploying internal portals
- Initiate request of an administrative procedure
- Follow-up the state of procedures
- Action request
- Alarms & notifications of Rejections or Approvals, etc.

# 02.3 Mobile Deputy's Office Network Architecture with three security levels (I):

## 02.3 Mobile Deputy's Office

### *Network Architecture with three security levels (II):*

There are three different security layers, DMZ1, DMZ2 and internal network.

All the services are replicated in order to provide high availability and failure tolerance, using clusters and load balancing. Two firewalls (in high availability) exist in order to separate the access to these three layers. The firewall software is from two different manufacturers which increase the defense against possible attacks.

#### **1** The first layer

The first layer, which is exposed to public Internet, contains the hardware antivirus, the exterior connection services (e-mail sending, DNS and Proxy) and also, the web contents which are published by inverse proxy. The fact of presenting only an inverse proxy in the first layer, avoids presenting elements which may compromise the system security. For the same reason this first layer will never contain data or applications logic.

#### **2** The second layer

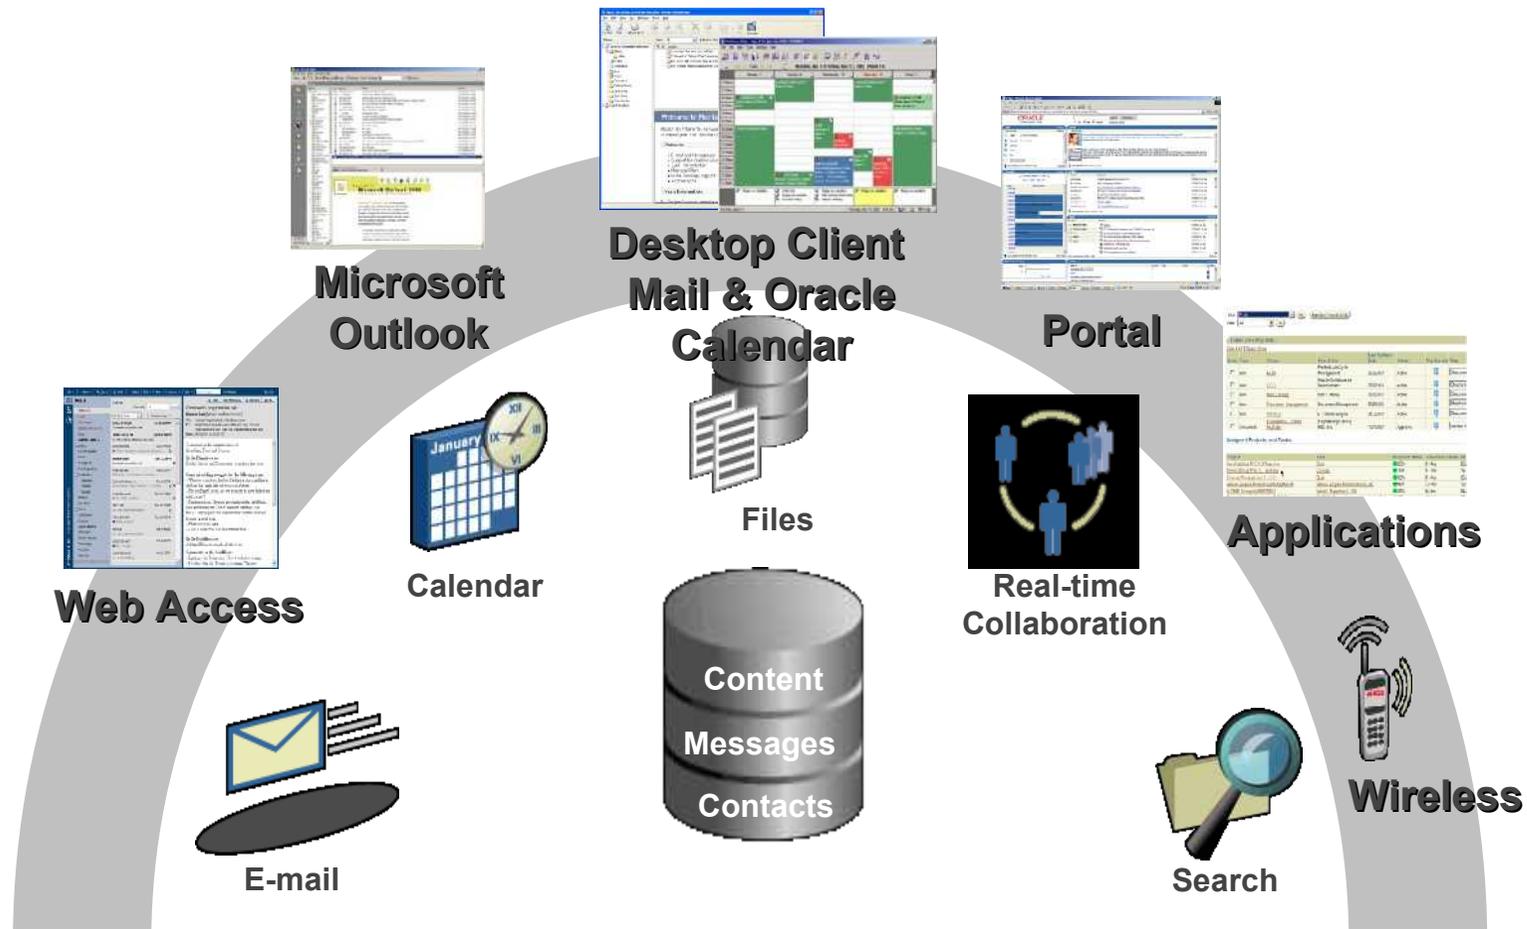

The second layer, the DMZ2, contains the application server, the applications itself, e-mail, single sign on and a cache service for web applications. Users can access to published web applications from outside the network, through the DMZ1 layer using the inverse proxy as an access point (connecting to the cache services of the second layer) or from the inside, through the DMZ2 layer with cache services. In both cases, the access will be canalized using load balancing, provided with high availability.

#### **3** The third layer

The third layer is the internal network, which contains the infrastructure elements and system data repositories (databases, file servers, OID, etc.). The access to the 'Oracle Internet Directory' information, where the user information and the organization structure resides, is achieved by load balancing in order to provide high availability.

## 02.3 Mobile Deputy's Office *Oracle Collaboration Suite, a Service Orientated Collaboration Platform*

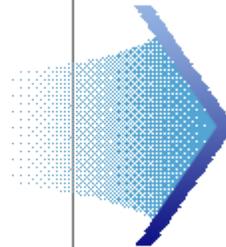

The Oracle Collaboration Suite exploits the Oracle Database and Oracle Application Server to deliver a standard-based collaboration platform that integrates e-mail, calendaring, web conferencing, file sharing, etc. delivered through Microsoft Outlook.

## 02.3 Mobile Deputy's Office

### *Oracle Collaboration Suite in the Mobile Office*

**Multichannel Access**  
**Collaboration Tools**  
**On-line Communications**  
**Virtual Collaboration Environment**

Access to personal information and collaboration tools, such as agenda and e-mail from any mobile device. This is due to the fact that Oracle Collaboration Suite take advantage of Oracle Wireless capacities.

Direct communication with collaborators using on-line collaboration tools, such as instant messenger and web-conference.

Collaboration environments depend on the different collaboration scopes, in such a way that a virtual environment will be generated with the contents and communications related to a specific issue.

## 02.3 Mobile Deputy's Office *Specific On-Line PDA Content*

### **On line alerts for needed action**

- Widget on PDA desktop alerting how many documents are waiting for signature.
- Widget on PDA desktop alerting about Received Government answers

### **Navigation / desktop tool with direct Access to web and parliamentary information.**

- Local PDA web navigation tool for parliament members.
- Direct access navigation to specific web content for parliament members.
- Public PDA web content.

### **Remote software & configuration management.**

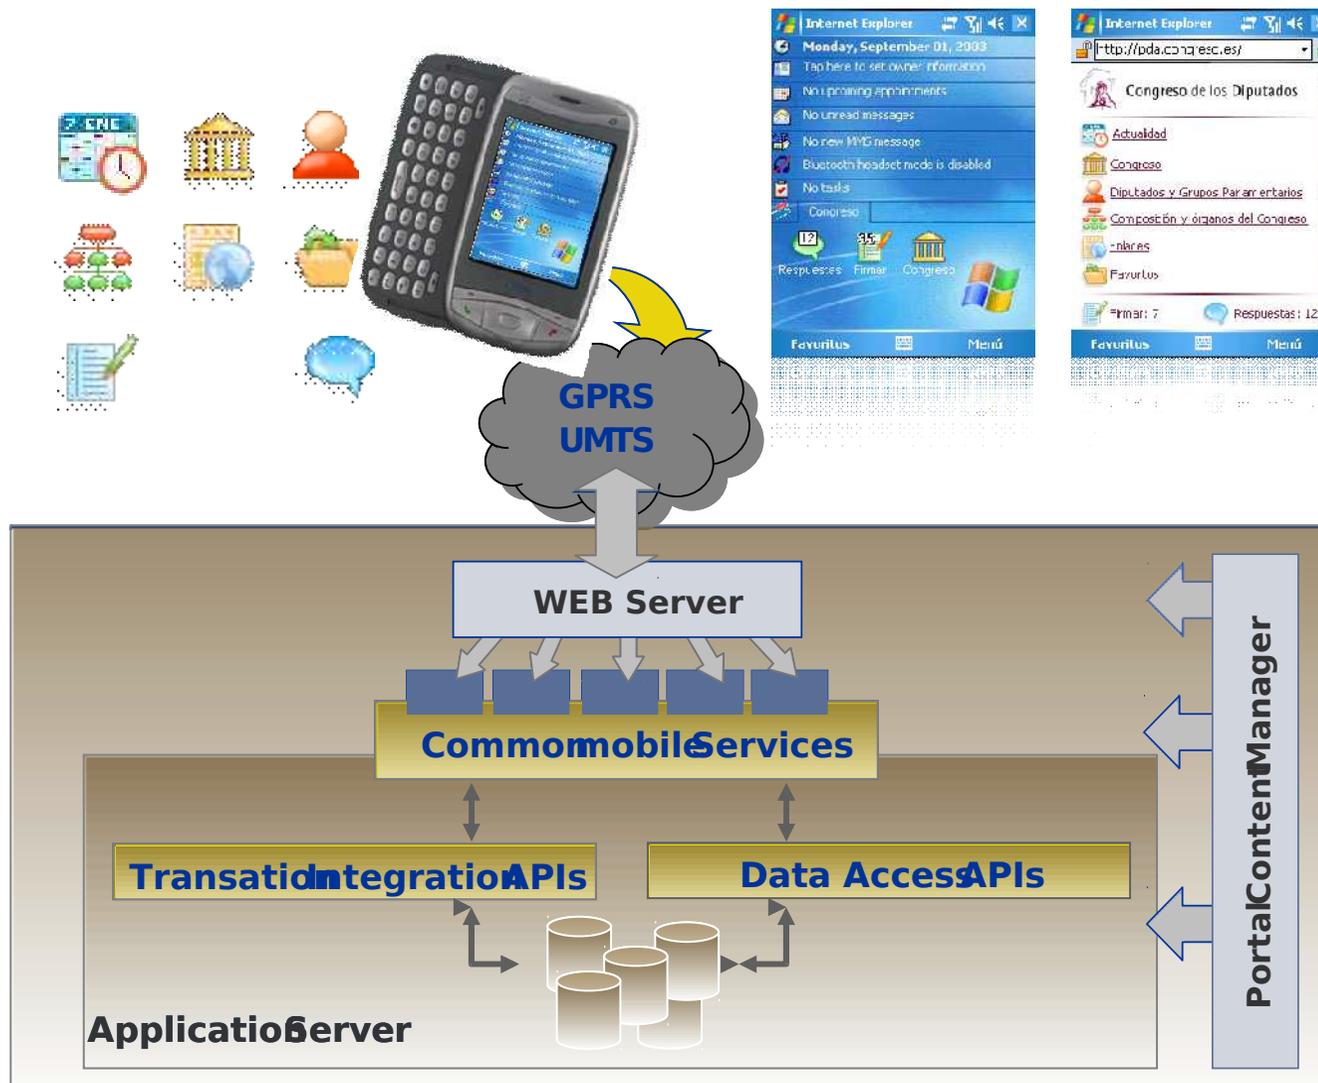

- Wireless PDA actualisation

## 02.3 Mobile Deputy's Office

### Direct Content access: Mobile Desktop Tool

## 02.3 Mobile Deputy's Office Public Web content for PDA
